

Updated hardware dataset | 2,000 architectures

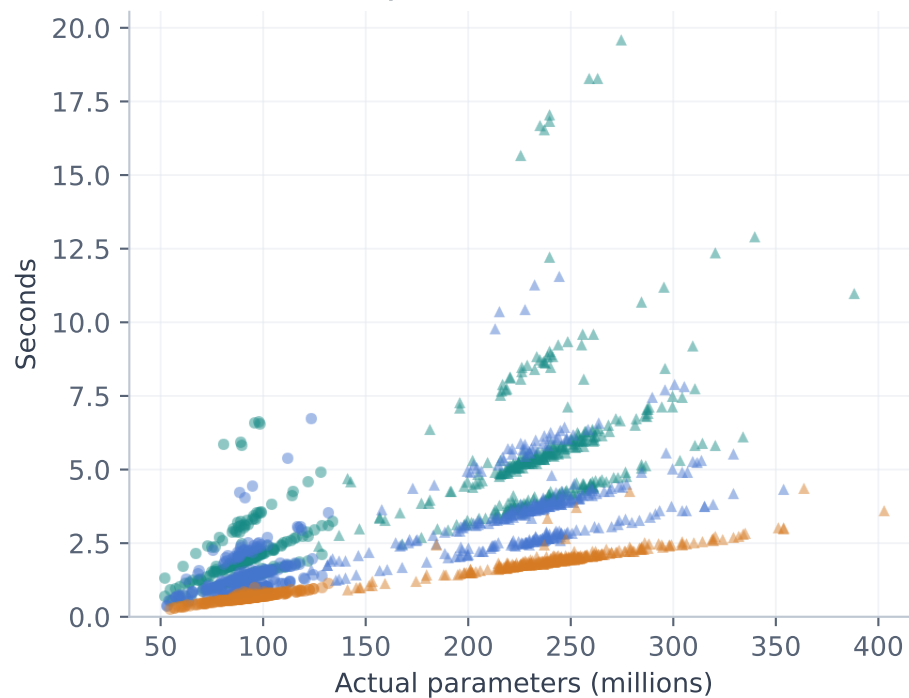

664 GS64 measurements replaced; 1,336 GS16/32 measurements retained

● GS 16 ● GS 32 ● GS 64 ● 135m family ▲ 360m family

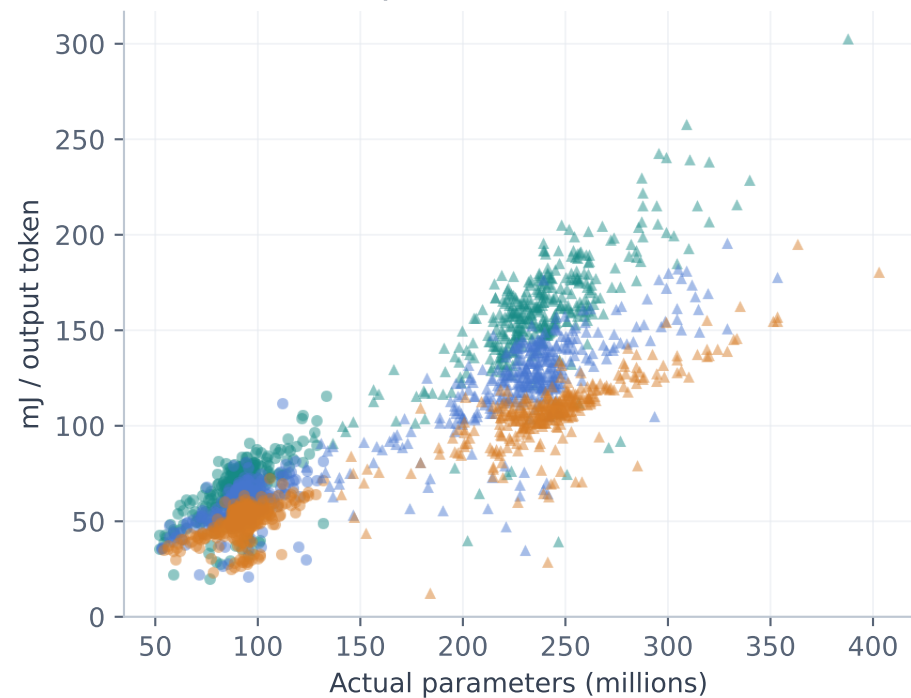

Decode throughput
2,000 valid labels

Time to first token
2,000 valid labels

Dynamic energy per token
2,000 valid labels

49 prompt tokens, 32 output tokens. All 417 energy-warning records are retained. No imputed labels.

Two kernel revisions: baseline GS16/32 + optimized GS64. Group-size strata contain different architectures, not matched GS variants.
